APMP Certification Program

INTRODUCTION

APMP is the association of record for bid, proposal, business development, capture, and graphics professionals. We offer the world's first, best, and only industry-recognized certification program for professionals working in a bid and proposal environment. APMP certification is the global standard for developing and demonstrating proposal management competency.

This certification syllabus is a list of competencies, each corresponding to skills or scenarios professionals commonly encounter in the bid and proposal environment. These competencies are organized into categories and are rooted in industry best practice, and recorded in the APMP Body of Knowledge and APMP Glossary of Terms.

There are three levels of APMP certification: Foundation, Practitioner, and Professional. This syllabus is designed to provide a basis for certification at each of these levels. It can also be used to inform the design, development, and use of certification training materials. The answers for both the Foundation and Practitioner exams are referenced to the APMP BOK—the official reference guide for all APMP certification exams

Certification Levels

FOUNDATION

Foundation Certification is designed for professionals who are relatively new to the bid and proposal environment. To achieve Foundation Certification, you must:

- Have at least 1 year of experience in a bid/proposal environment

The exam is a 1-hour, open-book, multiple-choice, 75-question pass/fail exam. Exam preparation is determined by level of experience, knowledge of best practices, and participation in training opportunities. APMP offers in-person training courses, printed study guides, and online resources as aids to help prepare for the APMP Foundation Level Certification exam. The questions will test your knowledge and understanding of APMP best practices at a recognized learning level:

- Learning Level 2: Sufficient knowledge and understanding to be able to recognize and distinguish the key elements of APMP best practices.

Foundation Certification is designed to assess understanding of relevant business development concepts. As you read through this syllabus, keep in mind that you need not have personally performed all of required competencies to achieve Foundation Certification. You should, however, be able to demonstrate your understanding of the competency by giving an explanation, listing supporting tools, or providing examples, as appropriate.

PRACTITIONER

Practitioner Certification is for experienced proposal professionals. It validates real-world mastery of industry best practices and the ability to lead others in their use. To achieve Practitioner Certification, you must:

- Be a member of APMP
- Have achieved Foundation Certification
- Have at least 3 years of experience in a bid/proposal environment

The APMP Practitioner Objective Test Exam (OTE) is a challenging exam that tests participants' knowledge based on:

- A provided scenario
- Your experience with the APMP approach as referenced in the APMP Body of Knowledge (BOK)

The questions will test your knowledge and understanding of APMP best practices at two recognized learning levels:

- Learning Level 3: Application of best practices for a given situation within a scenario
- Learning Level 4: Analysis of best practices for a given situation or activity within a scenario and how the questions differ from those in the APMP Foundation Exam

Whereas the questions in the APMP Foundation Exam are scenario-independent and multiple choice, the questions in the APMP Practitioner OTE require you to provide answers tracked to the scenario provided. The questions in the APMP Practitioner OTE are more challenging because they are designed for professionals with at least 3 years of industry experience in bidding and proposals.

PROFESSIONAL

Professional Certification is for professionals with extensive experience and superior leadership and communication skills. Individuals with Professional Certification are recognized for developing others and for improving process and infrastructure to the benefit of their organizations. To achieve Practitioner Certification, you must

- Be an APMP member
- Have achieved both Foundation and Practitioner Certification
- Have at least 7 years of experience in a bid/proposal environment
- Provide a reference who can assess your performance on Behavior and Attitude competencies
- Deliver a Proposal Professional Impact Presentation (PPIP)

During this presentation and interview, you will defend your professional contributions to a panel of evaluators, who will assess your impact and communication and leadership skills.

Professional Certification is design to assess advocacy with regard to business development best practices. As you review the syllabus, keep in mind that to achieve Professional Certification, you must not only understand and have experience performing each of the required competencies, you should also be a leader in increasing these competencies' application within your organization.

CONTINUING PROFESSIONAL DEVELOPMENT

Professional development doesn't end with achievement of a new certification level. All APMP-certified professionals are expected to earn and track Continuing Education Units (CEU). The number of CEU you must earn depends on your level of certification. Every 2 years, those with Foundation Certification must earn 20 CEU; those with Practitioner and Professional Certification must earn 40 CEU.

You can earn CEU by participating in training; preparing materials, including articles, websites and blogs, conference presentations, and books on business development topics; attending events; volunteering, and studying independently. You are responsible for tracking your own CEU. Use the Professional Development section of your profile on the APMP website to log your CEUs. CEUs are periodically audited through the site.

PROFESSIONAL ACCREDITATION PROCESS

The diagram below illustrates the steps to becoming certified by APMP.

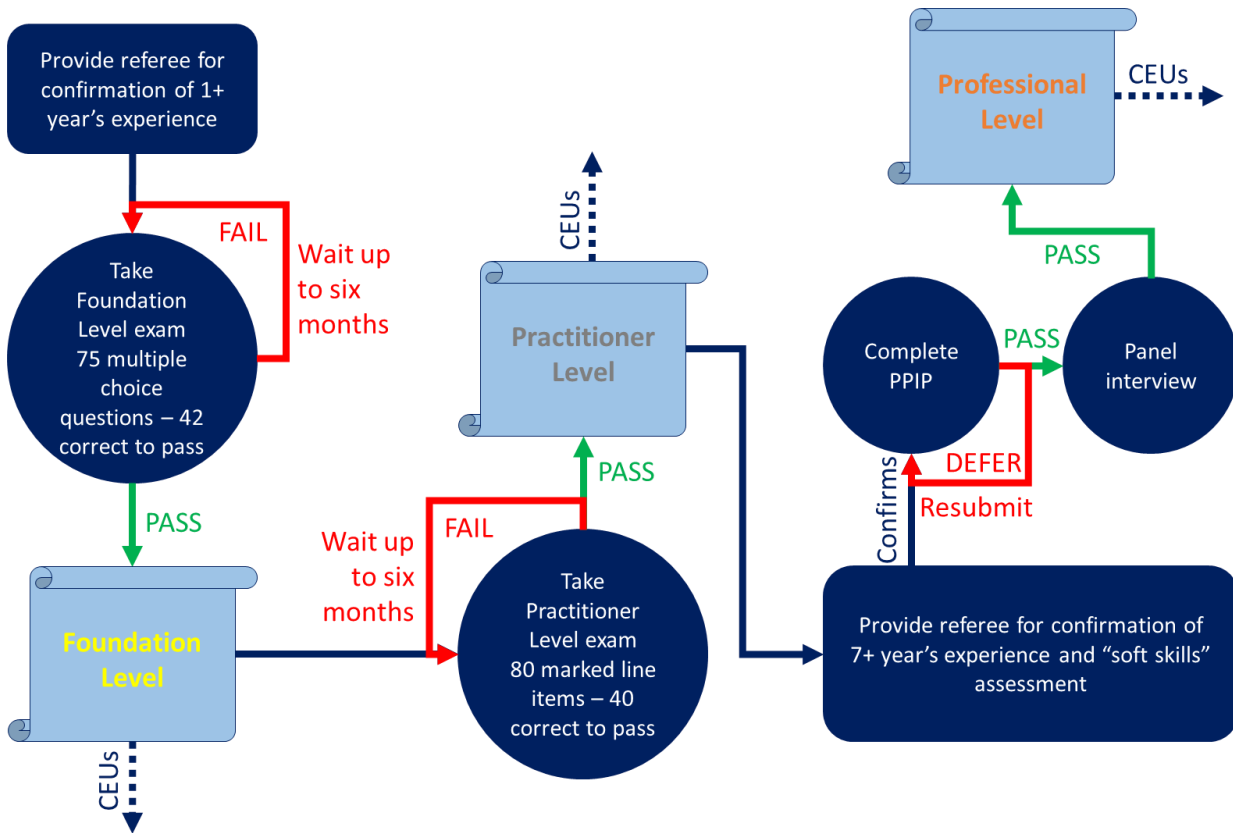

Figure 1: The Professional Accreditation Process: *Through a formal process of examination, self-assessment, and interview, APMP members can demonstrate their mastery of the knowledge, skills, and attitudes required of the Proposal Management Professional.*
